

Division: Engineering Products

Sub Division: Special purpose machines

We are supplying Special Purpose Machines (SPMs) tailored to meet your unique production requirements. Whether you need automation, precision, or high-speed operations, we can supply custom machines that optimize your process efficiency and product quality.

Our SPM solutions are built as per customer specifications and are ideal for applications such as:

- Automated drilling, tapping, or pressing
- Leak testing and inspection
- Robotic and pick-and-place systems
- Custom assembly lines
- Functional testing equipment

We are ensuring end-to-end support — from concept to commissioning.

8, Khodiyar Chamber, Maheta Market, Surendranagar, Gujarat, India, 363001.
