

Division : Agriculture & Food Products

Sub Division : Tea, Coffee, Sugar, Jaggery and Honey

Sr. No.	Description	Photograph
1	Black Tea (Assam, Darjeeling, Nilgiri, CTC) – Rich in antioxidants, strong flavor and brisk taste. Boosts energy, aids digestion, and improves heart health. Widely used as a morning beverage.	
2	Green Tea – Contains catechins and polyphenols that promote weight loss and detoxification. Enhances metabolism, skin health, and brain function. Consumed plain or with lemon/honey.	
3	White Tea (Darjeeling) – Light, delicate, and minimally processed tea. High in antioxidants, supports skin health and slows aging. Often enjoyed without milk or sugar.	
4	Oolong Tea (Nilgiri) – Semi-fermented with a floral aroma and mild taste. Helps in fat burning, lowering cholesterol, and mental alertness. Best consumed without milk.	
5	Herbal Tea (Tulsi, Lemongrass from India) – Caffeine-free infusion with medicinal herbs. Supports immunity, relieves stress, and aids digestion. Taken as a natural health tonic.	

6

Masala Tea Blend – Mixture of black tea with Indian spices like cardamom, ginger, and cinnamon. Improves digestion, boosts immunity, and provides warmth. Popular as "Chai" in India.

7

Organic Tea – Grown without pesticides or chemicals. Rich in natural flavor and nutrients. Used for healthy and eco-friendly tea drinking.

8

Flavored Tea (Jasmine, Lemon, Mint) – Infused with natural flavors and aromas. Refreshing, soothing, and uplifting mood. Consumed as a variety of specialty teas.

9

Loose Leaf Tea – Whole leaf tea with strong aroma and natural oils intact. Provides better flavor and antioxidants than tea bags. Preferred by tea connoisseurs.

10

Arabica Coffee Beans (Coorg & Wayanad) – Smooth flavor with mild acidity. Rich aroma, less caffeine, widely used in premium coffees. Preferred for espresso and filter coffee.

11

Robusta Coffee Beans (Karnataka & Kerala) – Strong, bold, and bitter taste with high caffeine. Enhances crema in espresso blends. Used in instant coffee production.

12

Instant Coffee Powder (Indian Blend) – Pre-brewed and dried coffee granules. Quick to prepare, portable, and retains flavor. Popular for fast coffee making.

13

Organic Coffee – Cultivated without chemicals or synthetic fertilizers. Rich in antioxidants, healthier for consumption. Supports sustainable farming.

14

Single Origin Coffee (Coorg, Araku Valley, Chikmagalur) – Beans from one specific region. Unique flavor profile, high quality, and traceable source. Favored by specialty coffee drinkers.

15

Green Coffee Beans – Unroasted raw coffee beans. Rich in chlorogenic acid, aids weight loss and metabolism. Used in dietary supplements.

16	Coffee Pods & Capsules – Pre-measured sealed coffee servings. Ensures convenience, freshness, and quick brewing. Compatible with coffee machines.	
17	White Granulated Sugar – Refined crystals with neutral sweetness. Used in cooking, baking, and beverages. Common household sweetener.	
18	Brown Sugar – Contains molasses, soft and moist texture. Adds caramel flavor and moisture to baked goods. Used in cookies, cakes, sauces.	
19	Demerara Sugar – Large golden-brown crystals. Crunchy texture, mild toffee taste. Sprinkled on desserts and coffee.	
20	Turbinado Sugar – Partially refined with light molasses flavor. Coarse texture, natural golden color. Used in beverages and baking.	

21	Powdered Sugar (Icing Sugar) – Finely ground sugar with smooth texture. Used for frosting, dusting, and quick dissolving. Essential in bakery products.	
22	Organic Sugar – Made from organically grown sugarcane. Free from chemicals, retains natural minerals. Used as a healthy alternative.	
23	Cane Sugar – Directly extracted from sugarcane juice. Less processed, retains some nutrients. Used in traditional cooking and sweets.	
24	Sugar Cubes – Compressed sugar in cube form. Easy portioning for tea and coffee. Convenient for serving.	
25	Molasses – Thick dark syrup byproduct of sugar refining. Rich in minerals like iron and calcium. Used in baking, rum, and sauces.	

26	Jaggery – Unrefined sugar made from sugarcane or palm sap. Rich in minerals, boosts energy, aids digestion. Common in Indian sweets.	
27	Jaggery Powder – Granulated form of jaggery. Easy to mix and store, same health benefits. Used in beverages and desserts.	
28	Organic Jaggery – Made without chemicals or additives. Retains natural nutrients and antioxidants. Promotes eco-friendly consumption.	
29	Pure Raw Honey – Unprocessed and unfiltered honey. Retains enzymes, pollen, and antioxidants. Strengthens immunity and promotes healing.	
30	Acacia Honey – Light color with mild floral taste. High in fructose, slow crystallization. Popular for diabetic-friendly diets.	
31	Multifloral Honey – From multiple flower sources. Balanced taste, aroma, and nutrition. Common for daily use.	

32	Flavoured Honey (Tulsi, Ginger, Cinnamon) – Infused with natural herbs and spices. Boosts immunity, relieves cold and cough. Used as health tonic and sweetener.	
33	Honeycomb – Natural wax structure filled with raw honey. Rich in nutrients, enzymes, and bee pollen. Consumed raw or used in gourmet dishes.	
34	Blended Coffee – Mixture of different beans and varieties. Balanced taste, aroma, and caffeine content. Designed for consistent commercial use.	
35	Decaffeinated Coffee – Beans with caffeine removed. Same flavor without stimulating effects. Ideal for late-night coffee lovers.	
36	Flavored Coffee (Cardamom, Vanilla) – Coffee infused with natural flavors. Enhances aroma and adds exotic taste. Used in specialty drinks and desserts.	
37	Decaffeinated Tea – Tea with caffeine removed. Suitable for sensitive individuals, supports relaxation and hydration. Consumed for flavor without stimulating effects.	

38	Tea Bags (Single & Bulk Packs) – Convenient pre-packed portions of tea. Easy to brew, portable, and consistent in taste. Commonly used in households and offices.	
39	Organic Honey – Harvested from organically managed hives. Free from chemicals, pure and safe. Consumed as a natural sweetener.	
40	Wildflower Honey – Collected from various wild blooms. Rich, complex flavor and seasonal variations. Used for health and culinary purposes.	
41	Forest Honey – Dark, strong flavored honey from forest flowers. Rich in minerals and medicinal properties. Used in Ayurvedic remedies.	
42	Creamed Honey – Processed to form smooth, spreadable texture. Easy to use on bread and desserts. Retains all natural benefits.
